Workshop „Being Refugee“

Abstract englisch

How about crawling through a long tunnel that ends up leading to someone else's consciousness?

This workshop deals with questions like these:

How can we convey the fate of millions of people?

Is it important to do politically motivated exhibitions?

Can knowledge, understanding and compassion change something?

I will bring three stories of refugees with me. In recorded interviews they talk openly and honestly!

This way we experience what it's like to be one of those people who cannot live safely!
